RE: Callville Bay Wastewater Treatment and Disposal System Upgrades  
Contract No. P12PC40123/LAME 110315A  
Lake Mead National Recreation Area, Lake Mead, NV

Dear Sharon:

On behalf of MarCon Engineering, Inc, I would like to take this opportunity to express our appreciation for your work and partnership on the Callville Bay Wastewater Treatment and Disposal System Upgrades project which we recently completed for the National Park Service at the Lake Mead National Recreation Area, Nevada.

This contract required the assignment of an Environmental Manager as one of our key staff members to manage the environmental coordination and oversight of the project work due to the nature and location of this work in an environmentally sensitive location. The challenges included biohazard removal, desert tortoise monitoring, waste management oversight, storm water pollution prevention (SWPPP) monitoring as well as very steep terrain and desert working conditions.

Your firm, including Environmental Manager Jonathan Tull and your assigned tortoise monitor, became an integral part of our field management team, displaying professionalism, reliability, and competency in the execution of the contract. As a result, our client was very comfortable with the capability of our team to perform the required work, fully trusting that a proper degree of environmental sensitivity and care would be a high priority.

We greatly appreciated your participation, and hope for another opportunity to work together in the future. Additionally, we highly recommend your services to anyone needing top notch environmental consulting and engineering. We wish you much success with your future endeavors!

Sincerely,

A handwritten signature in blue ink that reads "Barbara K. Cover Spear". The signature is fluid and cursive, with a large initial "B" and "S".

Barbara K. Cover Spear
